

AN ITCH

Prabal Jagadeesh Roddannavar

Ph. D. Scholar

Department of English

Karnataka University,

Dharwad-580 003

We see their faces around the world.
They are handsome;
They are ugly;
They are young;
They are old;
They are all infected by it;
It is an *itch!*-
A disease of men;
It sees no poor, no rich,
No old no minor.
No policy of Govt.
Can cure this disease;
Their symptoms are
Widely seen throughout
The world.
They have many tactics to
Control, but
They never worry;
They plan, and they prey.
But that disease has no cure.
After all, it is men's disease-
An itch on **P**__ __ **S**,
Season less.
